### Abstract

The paper is devoted to the study of cultural and natural sights of the Northwestern Black Sea region of Ukraine, revealing their historical significance, unique architectural and urban planning solutions, and favorable location. The study identified and analyzed manors that have survived in the suburban areas of large cities. In world practice, examples have been identified of preserving the cultural and natural heritage of suburban areas through the development of their recreational and tourist potential. On the basis of the investigated cultural and natural attractions of the Northwestern Black Sea region, weekend tourist routes have been developed. The main focus of scientific work is on the study and conservation of natural resources and unique historical palaces and estates on the example of the palace of the Kurisov family. This makes it possible to use effectively recreational areas to create an ecologically clean, comfortable environment for recreation of the population and the development of domestic tourism, as a result of the current global pandemic of the coronavirus infection COVID-19, which caused the closure of the borders of many foreign countries.

**Keywords:** Tourism; Northwestern Black Sea region; The manor; Architectural monument; Nature reserve; Landscape park; Tourist route.
